

PNP Forensic Group

2021 Annual Accomplishment Report

Executive Summary

In 2021, guided by its Core Values, “Discipline, Excellence and Integrity”, the PNP Forensic Group (FG) continues to be more relevant in criminal investigation in the pursuit of truth and justice through the application of forensic science in conducting laboratory examination on pieces of evidence that paved the way in the resolution of crimes that transpired within the period. The FG personnel continuously performs their duties and responsibilities as public servants and effectors of humanitarian service amidst the COVID-19 pandemic. The Unit maintains and exemplifies its core values to achieve the highest level of excellence in rendering quality forensic service to the PNP, other law enforcement agencies, and the public at large.

For more than seven decades in existence, the PNP FG has taken on a vision of global competence, performing various laboratory examinations on submitted and recovered pieces of evidence, and likewise appeared in courts as expert witnesses, which is a confirmation of the Unit’s relevance in the administration of justice.

PNP FG continuously improves its facilities and enhance the competence of its personnel through constant evaluation and process of certification to maintain credibility as forensic examiner in handling cases. The programmed in-service trainings for new personnel are religiously conducted to ensure that all its personnel are technically skilled and competent.

The provision of quota by the National Headquarters for FG recruitment strengthened its manpower complement. The acquisition of sophisticated equipment such as Rapid DNA analyzers, comparison microscopes, portable chemical detectors and document analyzers enhanced the technical capabilities of its regional forensic Units.

This Unit continuously reviews and update its existing systems and procedures and develop new ones to synchronize with the current PNP policies and rules and regulations as well as with the Criminal Justice System.

For the Unit's operational accomplishments, a total of **894,740** requests were received for forensic assistance; **1,268,843** laboratory examinations were conducted and completed **1,236,954** out of the total number. The pending requests for ballistics and DNA examinations were attributed to inadequate number of examiners as some PNCO examiners joined the Lateral Entry program and subsequently underwent at least a year of mandatory training.

There was a **7.30% or 60,843 increase** in the total number of requests received as compared with last year with **833,897**. The bulk of the increase came from the Internal Cleansing Program of the PNP.

Out of the total figure, **352,697** were requests from police investigators for incidents under investigation. There was **16,631 increase** as compared with the same period last year with **336,066**. Majority of the examinations performed were support to the investigation of drug cases, shooting incidents, and cases of found dead bodies.

SOCO assistance provided to the Investigators-on-Case (IOC) in processing crime scenes registered at **5,825**. There was a decrease of **237** cases or **4.24%** as compared to the same period last year with **5,588**.

SOCO Teams responded to the following: **2,213** shooting incidents; **1,861** cases of found dead body (Death under Investigation); **33** incidents of explosions/bombings; **221** cases of stabbing/hacking incidents, **389** cases of robbery, and **65** cases of theft.

On the other hand, a total of **2,212** Field Laboratory Works (FLW) were conducted. FLW are forensic activities that include the collection of specimen for laboratory testing from person and/or object in a place not usually the crime scene, ex. conduct drug test to different police stations, etc.

In support to the prosecution of criminal cases filed by the PNP and other law enforcement agencies, FG examiners and specialists rendered a total of **55,382** testimonies/attendance to various courts of law nationwide. These were out of the **59,139** subpoenas received relative to the forensic examinations conducted and other technical assistance. The variance was due to conflict of schedules. In lieu of the unavailable forensic examiners, a representative or deferment letters were sent to the courts requesting for the re-scheduling of date of hearing.

For the Unit's PCR accomplishments under LOI SANTINIG, FG units nationwide conducted **6,788** Police Information and Continuing Education (*PICE*) to personnel, provided **881** broadcasted media activities, there were no educational tours accommodated.

On LOI SAMBAYAN, a total of **659** lectures on the Unit's technical capabilities and crime scene protection were conducted to **10,979** individuals, composed of students and barangay officials. A total of **4,571** activities were undertaken to sustain partnership and collaboration with the community, stakeholders, other pillars of the Criminal Justice System (CJS), and other law enforcement agencies. On the other hand, a total of **5,380** community assistance and development activities such as disaster preparedness and response awareness, religious activities, physical fitness, environmental protection, medical mission, feeding activities and blood-letting were conducted.
